Montefiore Medical Center
Department of Dentistry Announces

CONSCIOUS PATIENT MANAGEMENT WITH IV AND NITROUS SEDATION IN GENERAL DENTISTRY

July 13 – 19, 2008
December 7 – 13, 2008

July 12 – 18, 2009
December 6 – 12, 2009

Montefiore Medical Center
Department of Dentistry
Centennial Building
3332 Rochambeau Avenue
Bronx, New York 10467

Two medical syringes are shown in the foreground, angled diagonally from the bottom left towards the top right. The syringe in the foreground is in sharp focus, showing its plunger and the scale on the barrel with markings at 0.5, 1, 1.5, 2, and 2.5. The second syringe is behind it and is out of focus. The background is a light blue gradient.

*This course meets ADA guidelines, New York State
practice requirements, and the practice requirements of other states.
Approved for Academy of General Dentistry Credit*

Statement of Need

Certification is required by all states for the administration of intravenous sedation by dentists. The goal of this course is to enable and prepare dentist to incorporate and utilize the techniques of intravenous conscious sedation in their practice in order to help patients safely reach a stage where they are awake, comfortable and cooperative, without any anxiety.

Course Objectives

At the conclusion of this educational activity, the participant should be able to:

- Describe appropriate components of primary sedation assessment
- Demonstrate appropriate use and interpretation of pulse oximetry and capnography for patients undergoing sedation
- Describe and demonstrate appropriate intravenous catheter placement
- Demonstrate safe and effective titration of midazolam to a level of minimal sedation
- Demonstrate proficiency in generating an anesthesia record of care for patients undergoing intravenous sedation
- Demonstrate an understanding of the pharmacology of drugs used in intravenous minimal sedation and the pharmacology and appropriate use of reversal agent
- Understand how to identify and initially manage major medical emergencies that patients may encounter while undergoing sedation

Pre-requisite for The Course

The participant must have DDS or DMD degree and be licensed to practice dentistry in New York State. To apply for NYS licensure visit www.op.nysed.gov

Current certification for Cardiac Life Support, Mandated Training of Identification and Reporting Child Abuse and Maltreatment and Mandated Training for Infection Control and Barrier Precautions is required prior to attending the course. In addition, please submit copy of your current liability coverage. CD-Roms and textbook are provided to study, at home, before attending the course.

Curriculum

This 90 hours curriculum includes didactic material related to patient evaluation and complications, pharmacology and physiology of agents, as well as psychological consideration of pain control in dentistry. Forty-five percent of the course is devoted to performing clinical dentistry on appropriately sedated patients.

This course satisfy American Dental Association Guidelines, New York State practice requirements and the practice requirements of other states.

COURSE DIRECTOR

Richard Kraut, DDS

Professor and Director of Oral and Maxillofacial Surgery
Albert Einstein College of Medicine
Chairman, Department of Dentistry
Montefiore Medical Center

Born and raised in the Bronx, Dr. Kraut graduated from New York University College of Dentistry and spent 20 years in the United States Army where he completed training in oral and maxillofacial surgery. He retired as a full colonel and joined the staff of Montefiore in 1988 as chief of the Department of Oral and Maxillofacial Surgery. Dr. Kraut is board certified in oral and maxillofacial surgery, dental anesthesiology and oral medicine, and has special interests in dental implants, major bone grafting and tumor reconstruction. He is a sought-after speaker and has lectured in Russia, South Africa, Japan, India and throughout Europe.
